Beginning June 2010, we have introduced **many new features and improvements**. To list a few:

- ready for iPhone 4 and iOS 4
- mobile device management (remote wipe, password lock, ...)
- mobile tasks sync (on devices supporting mobile tasks)
- new mobile browser interface (for iPhone, Windows mobile, Android) including tasks and shared calendars/contacts (ssl.interways.de)
- social networks integration (Facebook, Twitter, Digg online)
- read receipts active
- shared contacts on iPhone
- direct sync for Apple address book via CardDAV
- own user-defined Black- and Whitelists for Spam filters
- detail improvements for calendars, contacts

and much more...
